45 g

Individually boxed

Compliant with (EU) regulation 2016/425 on personal protective equipment, Class II (protection against moderate risks) EN 166:2001.

Design.

The 'elasto' safety goggles impress on account of their simple and practical unisex design with transparent legs. They provide reliable protection for your eyes, while also looking the part at the same time.

Protection.

They have been designed to protect the eyes from airborne environmental particles and offer mechanical protection against flying particles. Saliva droplets are also prevented from getting into the covered area.

By putting on the glasses, the wearer avoids unintentional contact between the hands and the eyes, thus keeping him/herself protected.

Cleaning.

To ensure a long product life and a clear view at all times, the safety goggles can be easily cleaned using a standard cleaning agent or disinfectant and a soft cleaning cloth.

Safety.

The raised lenses sit directly against the face, which offers additional protection. The same applies for the integrated lateral and eyebrow protection.

Light weight.

On account of their low weight, the 'elasto' safety goggles offer excellent comfort. Due to the carefully thought out design, they do not rub against the nose. Likewise, the design minimises pressure at the contact points when objects hit against the lenses.
