Product details.

A lateral flow immunoassay intended for the qualitative detection SARS-CoV-2 nucleocapsid antigens in nasal swab from individuals aged 7 years or older.

The test is particularly characterized by its simple and safe application. To perform the test, a swab is taken from both nostrils and evaluated using the test cassette. After only 15-20 minutes, the test shows the result.

-  Simple sample extraction.
-  No additional equipment required.
-  Results easy to read.
-  Fast results.
