

# Key Fob.

Quality Made in Germany.

Production capacity:  
8.000 units/day

Fast and flexible  
delivery times.

Short transport routes.

## Material.

Lightweight key fob made of polypropylene. This material is characterised by its durability and robustness.

## Regionality.

From development to construction to the finished item, the complete process is carried out by elasto, here Bavaria. If desired, this key fob can also be decorated directly by us with a design of your choice.

## Wide range of uses.

Perfectly suitable for the contactless operation of light switches, PIN pads, cash machines, and for opening doors. The key fob can easily be attached to your keyring, allowing you to keep it ready for use when it is required.

Use this reliable and practical helper for real protection in the serious situation in which we currently find ourselves.

## Cleaning.

This key fob can easily be cleaned with a cloth and detergent. It can also be cleaned with disinfectant. This means that it can be reused again and again.
