

Mask Holder.

Quality Made in Germany.

Production capacity:
8.000 units/day.

Fast and flexible
delivery times.

Short transport routes.

Material.

Lightweight mask holder made of polypropylene. This material is characterised by its durability and robustness.

Regionality.

From development to construction to the finished item, the complete process is carried out by elasto, here Bavaria. If desired, the masks can also be decorated directly by us with a design of your choice.

Use & Fit.

Prevent painful ears after long use of your mask. The holder shifts the load away from sensitive ears to the back of the head. It is suitable for use with all conventional breathing masks. Due to the large number of hooks, your mask can be perfectly adjusted to the circumference of your head. Use this reliable and practical helper to provide you with real protection in the serious situation in which we currently find ourselves.

Cleaning.

The mask holder can be cleaned with a cloth and detergent. It can also be cleaned with disinfectant. This means that it can be reused again and again.
